

**GENERAL INFORMATION:**

- This surge protector is for outdoor use.
- The CI-POE-1000 is to be used with CAT5/5E cables.
- Max Voltage on Pins [1-8] 60V
- Standard Compliance UL497B, IEEE-802-3t, IEC-61000-4-5

**New Installation:**

1. Turn off the power to the equipment to be protected
2. Disconnect the existing network line from the equipment to be protected
3. Insert the ground wire into the ground tab and make sure the device is securely earthed. It is very important that the CI-POE-1000 is connected to an adequate ground system preferably the power service grounding electrode system. The ground wire should be at least #12 copper. The grounding conductor should be run to the grounding electrode (rod) in as straight a line as possible. If bends are needed, make the bend radius not less than 4".
4. Connect the ethernet cables to the RJ45 connectors of the CI-POE-1000 unit.
5. Make sure all the connections are reliable and power on the system.

DWG# 10POE1000 REV A

**LIMITED WARRANTY**

Cable Innovations, Inc warrants its products to be free from defects in material and workmanship for a period of two (2) years. If a product proves to be defective in material or workmanship during the warranty period, Cable Innovations, Inc will, at its sole option, repair or replace the product.
