

# PLS-125P INSTALLATION INSTRUCTION

## Installation:

Mount the PLS-125P to the electrical outlet inside the power supply housing as shown in (Figure 1).

## What do the LED indicators tell me?

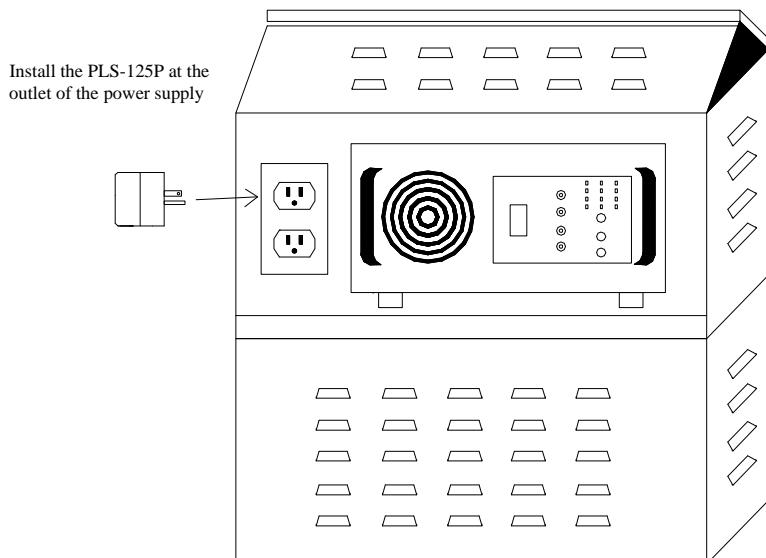

GREEN LED ON: Indicates the grounding is operational.

RED LED ON: Indicates the surge protection circuitry is operational.

## How can I tell if the PLS-125P is working?

The rated varistor voltage of an MOV can be tested with a variable voltage DC source ammeter and DC voltmeter across the device. Measure the voltage at 1.0mA and compare to the rated varistor voltage of the unit.
